

Clark Forklift

Clark Forklift Forklift Training - At present, there are at least 350,000 Clark lift trucks performing worldwide, and more than 250,000 in use in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 unique designs of forklifts, with parts covering more than 120,000 specialized items for all of its automated equipment. Your regional Clark Dealer is your complete source for availability of all your parts needs provided by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently stationed in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Globally, Clark has one of the most impressive supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is now a customary feature on every forklift.

Clark's recurrent mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck maker across the world to be certified with the internationally approved quality standard ISO 9001 for every one of their production facilities. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Resource Efficient Production

Clark has chosen the very economical and advantageous system of "Lean Manufacturing" for its assembly plants and application of resources. This system was established to acknowledge the most effective approaches of production plant management and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working together, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The contemporary value engineering agenda combines modern product growth and offers improved consumer support and service within the industry.
