

## **Bucket Truck Training Whitby**

Bucket Truck Training Whitby - The Vehicle-Mounted Aerial Work Platform or likewise called bucket truck training program is intended to lessen the risk of personal injury and incident while working with or in close proximity to bucket trucks by efficiently training qualified operators. An aerial lift device is any vehicle-mounted device, telescoping or articulating, or both, which is utilized to position workers to reach places which will otherwise be inaccessible. Aerial lift devices are used to be able to elevate personnel to above-ground work sites.

The goal of the program is to provide operators with the knowledge, skills, training materials and abilities needed to learn to operate vehicle-mounted aerial work platforms safely and effectively.

The program has two portions: a hands-on session and a classroom training session. To become certified, participants should be successful in both components. A wallet-size certificate and a full-size certificate will be given upon completing the program.

The types of lifts examined in the program include Aerial lift devices are usually constructed with metal, wood, fiberglass, reinforced plastic or other materials.

### **Definitions**

Articulating boom platform: many hinged boom sections.
